Opening a New Shopping Mall in Kuala Lumpur, Malaysia

### **Business Problem**

- Location of the shopping mall is one of the most important decisions that will determine whether the mall will be a success or a failure
- Objective: To analyse and select the best locations in the city of Kuala Lumpur,
  Malaysia to open a new shopping mall
- This project is timely as the city is currently suffering from oversupply of shopping malls
- Business question
  - OIn the city of Kuala Lumpur, Malaysia, if a property developer is looking to open a new shopping mall, where would you recommend that they open it?

#### Data

- Data required
  - OList of neighbourhoods in Kuala Lumpur
  - OLatitude and longitude coordinates of the neighbourhoods
  - OVenue data, particularly data related to shopping malls
- Sources of data
  - OWikipedia page for neighbourhoods
    - (https://en.wikipedia.org/wiki/Category:Suburbs in Kuala Lumpur)
  - OGeocoder package for latitude and longitude coordinates

#### OFoursquare API for venue data

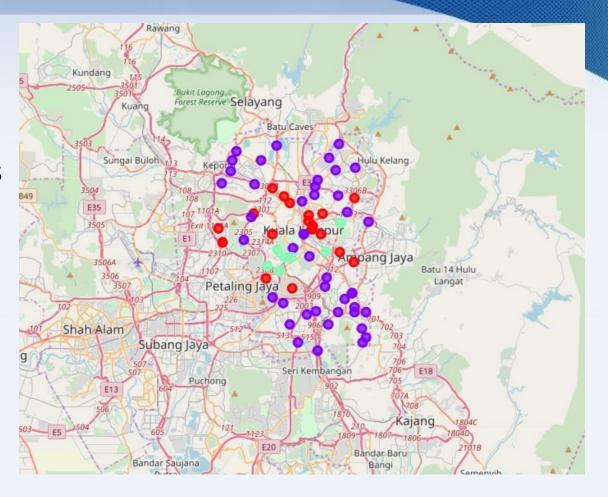

### Methodology

- Web scraping Wikipedia page for neighbourhoods list
- Get latitude and longitude coordinates using Geocoder
- Use Foursquare API to get venue data
- Group data by neighbourhood and taking the mean of the frequency of occurrence of each venue category
- Filter venue category by Shopping Mall
- Perform clustering on the data by using k-means clustering

• Visualize the clusters in a map using Folium

## Results

- Categorized the neighbourhoods into 3 clusters :
  - OCluster 0: Neighbourhoods with moderate number of shopping malls
  - OCluster 1: Neighbourhoods with low number to no existence of shopping malls
  - OCluster 2: Neighbourhoods with high concentration of shopping malls

### Discussion

- Most of the shopping malls are concentrated in the central area of the city
- Highest number in cluster 2 and moderate number in cluster 0
- Cluster 1 has very low number to no shopping mall in the neighbourhoods
- Oversupply of shopping malls mostly happened in the central area of the city,
  with the suburb area still have very few shopping malls

### Recommendations

 Open new shopping malls in neighbourhoods in cluster 1 with little to no competition

- Can also open in neighbourhoods in cluster 0 with moderate competition if have unique selling propositions to stand out from the competition
- Avoid neighbourhoods in cluster 2, already high concentration of shopping malls and intense competition

### Conclusion

- Answer to business question: The neighbourhoods in cluster 1 are the most preferred locations to open a new shopping mall
- Findings of this project will help the relevant stakeholders to capitalize on the opportunities on high potential locations while avoiding overcrowded areas in their decisions to open a new shopping mall

# Thank you!
